

Seventh Grade Students Fete Their Mothers

It has been Open House time in the Homemaking Department Stephen M. White Junior High School. The seventh grade Foods Classes entertained mothers, friends, and faculty with "coffee hours" in the dining room of the Homemaking Department.

The girls served their guests cookies, coffee, and cranberry punch from an attractively set table covered with a delicate pink table cloth and roses for a centerpiece. All food was prepared in the seventh grade food classes under the direction of their teachers, Mrs. Holley, Mrs. Olds, and Miss Calder.

Fifteen models from Clothing I entertained with a Fashion Show. Following this the guests went to Whitehall where the Homemaking Fair was held. Here they found a display of projects made in all Home-making classes. Mothers learned of the many opportunities girls have in the various Home-making classes of Stephen M. White Junior High School.

Dyna-Soar Contract to Garrett Corp.

The Garrett Corp. of Los Angeles has been awarded a major subcontract by Boeing for research and development work on the Dyna-Soar manned space glider.

It was the fourth important subcontract awarded by Boeing which involved Dyna-Soar's integrated hydrogen power and cooling system. Other winners were Westinghouse Electric Corp., Sun-stran Corp. and Thompson Ramo Wooldridge.

No exact dollar figure was given for the Garrett pact, but Boeing said the four awards total nearly \$9 million.

UNDER THE terms of the agreement, Garrett's AirResearch Manufacturing Division will develop Dyna-Soar's hydrogen cooling system, an important function in controlling the vehicles environment.

Hydrogen expelled from a hydrogen storage tank will enter a heat exchanger where it will absorb the heat extracted from the crew and equipment compartments.

Boeing's system contractor for the Air Force made the space glider. The National Aeronautics and Space Administration is participating in the technical development of the program.

THE DYNA-SOAR craft will be boosted into space by a Titan intercontinental ballistic missile. On its return from space, the glider will be able to maneuver in the atmosphere like an airplane and make a conventional landing at an airfield of the pilot's choosing.

First major test of the glider will be made when the craft is dropped from a B-52 mother ship. Later tests involving the booster and the glider will be conducted at Cape Canaveral, Fla.

Raft Skipper At South Hi

The Associated Student Body of South High School will present Capt. DeVere Baker of the Raft Lehi V on May 29th. The program will begin at 7:30 p.m., in the South High Cafeteria. Admission to this program will be free and the community is invited.

Captain Baker, in his presentation, has a method of combining adventure and history to emphasize the peril of communism, and to work toward world peace. This program is one which is very appealing to both adults and students. It should be especially appealing to see and hear the adventurer, as well as hear about his accomplishments and activities.

Pinching a plant at the proper time is the gardener's way of encouraging bushier growth and more bloom. This is especially true with bedding plants which you set out from nursery flats. Don't worry about losing that first flower bud. Let the plants establish themselves after setting them out, then take a good healthy pinch off the top of each one.
